Dear Resident,

Corona is a very dangerous and life-threatening disease. Against that background, many people are happy that there is now a vaccine available.

I am glad that you, as residents of a refugee shelter, will soon have the opportunity to be vaccinated.

You reside in a house with many people and share kitchens, toilets and showers. Therefore, you are at a greater risk of becoming infected.

Just a few weeks after the 2nd vaccination date, the protection of the vaccine takes effect.

**Therefore, I would like to encourage you: Please get vaccinated.**

Here you will find information from the Robert Koch Institute - also in your native language:

I trust the vaccine and will also get vaccinated.

Stay well and healthy.

Gudrun Brendel-Fischer, Member of the State Parliament
Integration Commissioner of the Bavarian State Government
